

WATER PROTECTION FOR MORTAR AND CONCRETE MASONRY UNITS

INCAP Admixture for Mortar (IAM)

INCAP Mortar Admixture is specially formulated to provide long-term protection in cementitious mortar by reducing both permeability and absorption. Building maintenance and repair costs can be significantly decreased by improving durability and by preserving the original appearance. It contains Technokotes' unique and proven INCAP technology to simplify installation and provide superior performance such as the ability to self-seal minor cracks and withstand water under pressure.

INCAP Mortar Admixture

- Lowers upfront building costs compared to surface-applied sealers
- Simplifies installation, eliminating labour, and shortening the construction cycle
- Increases the life of your mortar and decreases building maintenance and repair costs
- Increases durability and delivers a permanent solution with materials designed to last the lifetime of the mortar
- Maintains the original appearance and cleanliness for lasting building attractiveness

Packaging

25 kg re-sealable pails or paper bags

Product Code

IAM

Applications

Use IAM to provide permanent protection for:

- Rendering and plastering mortar (including stucco and other thin topping mixes) over concrete masonry walls or other prepared substrates
- Masonry mortar (i.e., mortar that goes between the masonry units)
- Concrete masonry units (i.e., bricks and blocks when they are manufactured)
