

## SEALKOTE PATCH

SEALKOTE PATCH is a ready, high performance permanent repair material for patching potholes, filling utility cuts, and repairing damaged asphalt. There is no mixing, tacking or mechanical compaction required and is a ready to use formula that can go straight from the bag to the repair area. SEALKOTE PATCH also works with concrete and steel and can be used in all weather condition and even water.

### Benefits

- Open to traffic immediately - no raveling or rutting
- No mixing, tacking or mechanical compaction required
- Non toxic
- Performance guaranteed
- SEALKOTE PATCH adheres to concrete, steel and asphalt in wet conditions or summer heat

### Application Advantage

#### Technical

With an ever increasing emphasis on cost efficient maintenance, SEALKOTE PATCH is the ideal product for effective pothole patching of asphalt and concrete roads, car parks, driveways and footpaths. SEALKOTE PATCH is a pre-mixed, high performance cold mix patching material made with crushed aggregate and a special blend of bitumen, anti-stripping additives and adhesion agents. It is more effective than traditional cut-back or emulsion cold mixes because of its tenacious binder adhesion properties. The combination of materials in SEALKOTE PATCH resists rutting while providing excellent bearing strength. Where other cold mix material may ravel and lift out because of poor adhesion, SEALKOTE PATCH will continue to perform. SEALKOTE PATCH is specifically engineered to remain somewhat pliable following application. This allows our product to eliminate small voids and crevices through continual compaction.

#### Commercial

SEALKOTE PATCH enables you to conveniently fix potholes, utility cuts and edge repairs, straight from bags kept in your own yard, ready for any job that comes up. Your work crews achieve twice as much because they are no longer required to complete any of the prep work associated with hot asphalt - with virtually no clean-up time required, no product wastage due to its storability and no traffic delays. SEALKOTE PATCH will even fix potholes full of water which traditional hot mix or conventional cold mix cannot do. SEALKOTE PATCH pavement repair is guaranteed to be permanent and is storable for up to 12 months in a bulk stockpile of a minimum of 30 Metric ton and up to 2 years in bag.
