

## Joint Sealers

### UREGEL

UREGEL is an elastic, low-modulus, non-sag, polyurethane sealant. It maintains flexibility and waterproofing joint sealing with high bond strength and provides outstanding durability in the civil and industrial construction markets. The product requires no mixing and typically requires no priming to bond to many materials, including concrete and masonry.

#### Benefits

- Ready to use and easy to gun and tool
- Low VOC content
- Maintains flexibility in moving joints +/- 35% joint movement capability
- No primer required for most construction materials
- Maintains excellent weather resistance, gives long lasting joint seal.
- Can be used in all climates
- Packaged in cartridges, sausages, and in bulk
- Superior bonding

#### Applications

UREGEL has very good adhesion to most construction materials. It is particularly recommended for expansion joints between precast concrete panels and seams on wooden, aluminium, and PVC joinery. UREGEL is highly recommended for bonding concrete and baked clay roof tiles
