

Coatings for Protection of RCC

UREKOTE 600

UREKOTE 600 is a two components, polyether based aliphatic polyurethane; self curing polyurethane applied through standard airless spray equipment, roller, trowel membrane.

Benefits

- Highly flexible - over 700% elongation.
- No seams or laps.
- Generally no priming required.
- Single layer application possible.
- Ready for immediate use
- Accommodates crack movement from 0 to 1.6 mm when fully cured at 1.3 mm thickness.
- Withstands hydrostatic pressure 14 m head of water while bridging a crack of 1.6 mm width.
- Over 15 years proven performance.
- Available in self-levelling grade or roll applied grade for easy application

Applications

Highly Elastic and Tough Membrane Coating

- Roofs
- Bridge Decks
- Tunnels
- Terraces
- Balconies
- Plaza Decks
- Planter Boxes
- Retaining Walls
- Internal Wet Areas
- Fountains and Pools
